The Bristol Siddeley Viper turbojet powerplant was selected to power the type The first delivery to a customer took place on 10 September 1964.. The design is redundant so that in the event of a single engine failing, all aircraft systems continue to operate normally.. Various interiors were offered, with a high degree of passenger comfort In an executive configuration, the flight deck is separated from the main passenger cabin; the single entrance of the aircraft, located directly behind the cockpit and forward of the passenger cabin, forms a vestibule area in which luggage can be stored and meals prepared during flight.

Between 1965 and 1972 Qantas used two Series 3s for crew training. Later on, more recent variants of the type were marketed as the Hawker 800. As of October 2012, Beechcraft does not intend to restart production of its business jet lines; instead the company intends to alternatively sell or dismantle the production facilities for the 125 family. After the jet achieved full production, the name was changed to HS 125 except for American exports which retained the DH. Hawker Siddeley Aircraft Series Is TheWriting in 1993, Flying Magazine said of the type In numerical terms, the 125 series is the most successful British commercial aircraft ever built, and the worlds longest in-production business jet. Some operators, such as the Royal Air Force, had equipped their 125s with electronic countermeasures to defend against hostile missile attacks upon the aircraft.
